

## 37<sup>th</sup> Rally Bohemia Reconnaissance Rides

PRESS RELEASE no. 19

Mladá Boleslav, 1<sup>st</sup> July, 2010

The recce rides of Rally Bohemia took the place on Wednesday and Thursday. The whole progress was monitored by ONI System, which provides the online information about the position of individual cars on the track and at the same time it controls their speed limits observing. The crews were allowed to make three passages, during which they had to prepare their pace notes and themselves for the demanding race.

After finishing the recce rides Martin Prokop revealed his feelings: “For me it is the same song all over again here. In comparison with the tracks I’m used to, it’s going to be really fast and in a close distance to trees. Bohemia is absolutely specific and except a few fast sections I have a lot of strictly sharp turnings. Special stages around Liberec city are particularly very demanding, but beautiful at the same time. I’m unable to guess our chances in such a loaded competition, but I’m looking forward to it. It’ll be a great set up for our start at the World Championship in Germany.”

“The character of special stages is fairly familiar to us, but in principle they are very demanding tracks, which are the habit of Bohemia. The competition is this year quite long and a decent portion of sharp kilometres waits for us out there. It will be challenging for the drivers, but also demanding for the technician as well. We are curious about the weather. Regarding the high temperatures the local storms may come and then the right choice of tyres plays its role. It’s hard to guess in advance,” adds Roman Kresta, six times absolute winner of Rally Bohemia.

The 37<sup>th</sup> volume of Rally Bohemia initiates the super SS in Sosnová on Friday 2<sup>nd</sup> July, 2010 at 17.05 hours. The Historic Show drivers get on the track the first and then the current competition cars, which will start in reverse order.
