1 INTRODUCTION

1.1 Welcome

Dear sports fans

Welcome to the 42nd Rally Bohemia 2015.

This year, the Rally Bohemia has newly become part of the FIA European Historic Sporting Rally Championship, the Czech Rally Championship and the Czech Historic Rally Championship and is also the final race of the Regional Rally Cup. On top of the racing events spectators will also see the very popular Rally Legend show.

The competing crews will go through 13 special stages, with a total length of 150 racing kilometres.

Our aim was to bring the Rally Bohemia closer to Mlada Boleslav. The result is a very compact competition with special stages which are attractive and demanding as usual. The schedule also sees a comeback of the Bzi special stage.

Various versions of regular special stages such as those of Sychrov, Sumburk or Vinec are also included in the schedule.

A few words on safety always appear at this point. The team of organizers has again made a step forward this year in that respect and increased the track's safety even further. We value the opinions of spectators as well as drivers and have also taken their comments from last year's edition into account.

I would like to extend my thanks to those municipalities and towns the course of Rally Bohemia 2015 runs through as we would never be able to organize such a great event without their tolerance.

I believe that all those taking part in this year's Rally Bohemia 2015 will adhere to organizers' instructions, stay within the professionally designed spectator zones and have a wonderful time throughout the competition.

Looking forward to meeting you on July 10-12, 2015.

Petr Eliáš, M.Sc.
Rally Director

In other cases the organizer can forbid this catering. Selling food and drinks in the service area without permit is strictly forbidden.

6 TWO-WAY RADIO

There are no restrictions for hand two-way radio.

7 FUEL

7.1 Refuelling

The competitors can refuel only at the designated refuelling points described in the itinerary. Any other activity inside the refuelling zone not related directly to refuelling of a particular car is prohibited. The maximum speed of 5 km/h is set for all refuelling zones. It is recommended for the technicians to wear a non-flammable suit. Only the competitor is responsible for refuelling. Every trespass will be announced to the Stewards. During refuelling engine has to be switched off.

It is recommended for the crew not to stay in a car during refuelling. Should the crew remain in the car, the seatbelt have to be unfastened. The car can be pushed out by the crew, functionaries and / or two team members without the penalization. Only in the case of providing help during refuelling two team members of each crew are allowed to step into this zone.

The organizers will arrange an additional zone dedicated to refuelling only. Any form of service excluding refuelling the car is in this zone prohibited and all other regulations apply in the same way as in other refuelling zones.

20.10 Traffic Regulations

The traffic on terrestrial roads in the Czech Republic is liable to the law no. 361 from year 2000.

Selection of the most important regulations:

- Crew has to fasten the seatbelts while driving.
- The use of mobile phone or other communication means is prohibited while driving.
- Driver cannot take any alcohol or other narcotics before and during the drive. Zero tolerance for alcohol in driver's body applies in the Czech Republic.
- Always give way to pedestrians on the crosswalks.
- Following speed limits applies:
 - urban area at 50 km/h
 - outside urban area at 90 km/h
 - motorways and highways at 130 km/h
- When driving on motorways and highways the car has to be equipped with vignette. This is valid also for competition cars. Be advised that competing crews will use these roads during rally. Vehicles over 3.5 t of weight use the electronic toll fee collecting system.
- Use of lower beam lights or other day lights is obligatory in the Czech Republic through the whole year.

21 HEALTH AND SAFETY

Should you decide to watch any of the special stages, you have to realize that you do it only at your own risk. Above all it is in your own interest to strictly follow instructions mentioned below:

ALWAYS

- get to know all the spectator's tips. Conform your special stage selection, accessing roads and parking places to them.
- choose only such spots, which are designated by the organizers to be organized spectator's places.
- park your vehicle on designated park places and lay-bay areas, which are marked by the organizers.
- be aware of the time limits, which are before and after the special stage and during which the special stage is closed.
- preoccupy your chosen spot in advance before the first competitive crew goes through.
- follow organizer's instructions, when you are asked to leave the area where you are.
- keep at safe distance from the road. There is no physical law by which racing car wouldn't end up in the place where you are standing. You must realize that racing cars go very fast. Technical fault or fault of the driver can never be eliminated.
- conform to bright judgment and good behaviour. Imagine yourselves in the organizer's shoes. Help by being an example to others.
- wait for the passage of opening car. Until this moment the route is still closed and there is high possibility that some late competition crew suddenly appears. The opening car carries white flag. So don't you worry, you will recognize it.
- be predictive, expect unexpected.
- look after yourself, your close ones and other spectators around you. Be an organizer to yourselves.

NEVER

- try to drive on the route of special stage.
- park at the place being an obstacle to crews, support cars, organizer cars, fire brigade vehicles and ambulance cars.
- try to enter the area marked as DO NOT ENTER!
- sit down while watching rally unless you are several meters above the route level!
- keep your hands in your pockets unless you are several meters above the route level!
- turn your back to driving thru cars, keep an eye contact on them!
- stay below the level of the route!
- stay in front of the solid obstacles while watching rally (fence, wall, rock, house, etc.). Think of possible leaving your spot quickly!
- trust the media writing about the protective security tape. It's a non sense, there is no such a thing.
- never believe the deception that you can't get hurt. It's a big mistake. Rally sport can be very dangerous.
- run cross the route of special stage. Only when it is really very necessary, remember that the time intervals between the racing cars are mostly around 1 minute. Relatively low risk lasts only 40 seconds (you have to take into account the different driving abilities of the competition crews and the distance between you and the start line).
- throw anything onto the route! You could jeopardise the safety of competition crews. Such behaviour is covered by law.
- let you children off your sight. You are fully responsible for their safety. Never put them in front of you for a better view.
- take you pets with you. They don't belong to rally. Make sure, that you pets are securely off the route.
- cover the signposts, labels, direction signs and other equipment or driving aids by you standing in front of it.
- copy the competition crews while on the ordinary road.

It is FORBIDDEN to be wild with putting up the tents, lighting up the fire along the whole route of Rally Bohemia. Breaking this restriction leads to the serious fine. The same it is with polluting the surroundings or damaging the forest or the agriculture, destroying or damaging the route barriers and other organizer's technical aids.

Keep clear of dangerous places! The most dangerous places are marked in red in these pictures.
